

AEWEN

Africa Europe Water Energy Network

2021 - 2024

OBJECTIVE

The project integrates **4** well established **European clusters** specialising in the complementary areas of **energy and water**, with the aim to **build a powerful network** to encourage **collaborations between African and European companies**.

MAIN ACTIVITIES

- ✓ Develop and implement a joint internationalisation strategy plan
- ✓ Organise online activities: country days, capacity building webinars and workshops
- ✓ Organise trade missions to Morocco, Senegal and Tunisia
- ✓ Organise B2B in Europe during well-established events
- ✓ Establish international partnerships

TARGETS

- 125 European and African players catalogued
- 15 Cooperation agreements with African partners
- 240 B2B Matchmaking sessions in Africa and Europe

This brochure is part of the AEWEN project (Grant Agreement 101035935), which has received funding from the European Union's COSME Programme

4 European Clusters

Tenerdis is a French energy cluster based in Auvergne-Rhône-Alpes, the largest industrial region in France. It is a gateway into a dynamic innovation ecosystem with over 240 members spanning industrials, small and medium enterprises, research and technology organisations and public bodies. Tenerdis covers the entire **energy value chain**.

Cluster TWEED* is a Belgian cluster organisation bringing together more than one hundred companies working on **sustainable solutions in the energy, environment and water sector**. Our goal is to strengthen exchanges and foster collaboration between our members in order to boost business opportunities and consolidate win-win partnerships.

*TWEED : Technology Wallonia Energy Environment and sustainable Development

Environment Park is a Technology Park based in Torino (Italy) that has been active for over 20 years in environmental innovation and sustainability. It manages the CLEVER cluster (Cleantech&Energy innovation cluster), the regional innovation cluster that operates in the **Energy and Clean Technologies field**.

The cluster aims to support its members in their ecological transition, through the supply of services, technical and methodological support and open labs.

The CATALAN WATER PARTNERSHIP (CWP) is the Catalan Cluster of the **sustainable use of water**, located in the North East of Spain. The CWP promotes projects and multilevel collaborations, for developing innovative & sustainable solutions to the global water needs, in any part of the world.
